How to tackle the cost of IT Refresh

Rossett School replace their entire PC estate at a fraction of the cost

Summary: Rossett School are a very large Secondary Academy (over 1,500 pupils), with a Sixth Form, based in Yorkshire. **As an outstanding academy Rossett are keen to maintain academic excellence** through a broad range of Curriculum activities. Technology forms a strong contribution to learning with an iPad parental scheme already into it's 3rd year. However the Academy maintains a number of desktop PC's for coding and subjects where this format benefits the users.

Technology Choice: With such a wide range of device types and manufacturers on the market, making the right choice can be difficult and time consuming. **Our shared aim: provide a higher spec without the higher price tag.** Without a clear vision on refresh some estates end up with multiple motherboards and processors around site which can cause image creation and deployment to be time consuming and frustrating. Rossett already moved some learning functions to tablet or speciality devices so this refresh encompassed 'work-horse computers' only. With a base specification of Core i5, Solid State Drives and 8GB Memory the aim was to **provide a long-term investment.**

Microsoft
AUTHORIZED
Refurbisher

Real Value for Money: The investment saved **over 60%** when compared to a brand new PC of a similar specification. With Microsoft's Authorised

Refurbisher accreditation, we can confidently propose refurbished equipment that come with extended warranties (up to 5 years) and quality guarantees that include brand new hard drives and genuine Microsoft Licencing. Ultimately the **refurbished PC's allowed Rossett School to purchase over 3 times the original amount they expected to be able to afford.**

Result Driven: With all the PC's at Rossett School replaced they can **focus on teaching and learning, with peace of mind that they have not had to compromise on performance.** Supplied with a full 3 years warranty and new keyboards and mice Rossett can work to maintain their outstanding status.

Why Odyssey?

With **over 30 years of combined experience** we will make your IT development a success.

Unbiased advice based on classroom impact to teaching and learning.

Always **striving for value for our customers**, we aim to work with your budget.

Expert and quality service throughout; from consultation to implementation & ongoing support.
